PROJECTS

[Booking.com](#) |

Clone of the popular Booking.com website. The site contained stays, flights, car rentals and attraction pages.

Features:

- Main pages for checking hotels and destinations.
- Searching functionality based on dates and places.
- Detail page for hotels and attraction places.

Tech Stack:

ReactJS | Material UI | HTML | CSS

Areas of responsibility:

- Built the header bar which was used in all pages.
- Built the Main page which showed stays section of the website where hotels can be booked.
- Took lead in setting up the base structure of the project.
- Driving the standup daily to get the progress on the project.

[MoviePedia](#) |

Modern fast movie database web app with React using The Movie DB API.

Features:

- Searching capability for all movies.
- Grid for showing popular movies.
- Movie Detail Page which showed all the details about the movie.

Tech Stack:

ReactJS | HTML | CSS

Areas of responsibility:

- Built the search feature which enabled fast searching of movies.
- Built the Main page which showed popular movies in a grid.
- Helped in finalising the UX for the project.
